

## S-Pod Bluetooth Pairing Guide (OTA Update Addendum)

## Bantam and SourceLT Pairing:

• Put the unit in pairing mode by turning dipswitch #1 from "Off" to "On" then back to the "Off" position. This gives you 60 seconds to pair to the app.

• Open the app (on Android devices, upon first opening of app, it will ask you to allow GPS location services, allow this) press "setup" then "scan".

• Select which device you want to pair to (Select SourceLT or BantamX depending on which unit you have).

## Over the Air Update Instructions: VERY IMPORTANT!!! Must be Performed as Soon as Device is Paired for the First Time!!!

• Once the pairing is complete, you will see an upgrade button appear on the bottom edge of the app as long as your device is connected to the internet.

• Once the button is pressed you will see the Bootloader status popup, select "OK" to continue

• You will see the upload progress indicator, DO NOT LET THE SCREEN SHUT OFF OR LEAVE THE DOWNLOAD WINDOW!!

• Once the Download is finished, follow the instructions in the popup and re-pair your device as you did in the beginning to complete the Firmware Update
